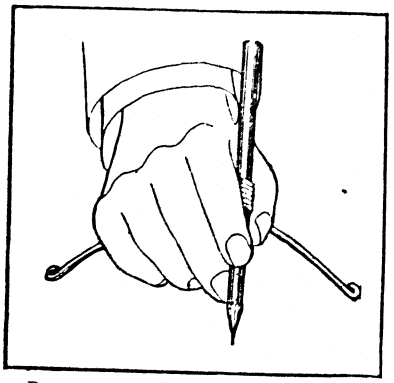
LOWE'S WRITING FRAME

For Beginners



Prevents turning hand to the right.

All teachers of handwriting, and especially supervisors and special teachers of this branch, know that many pupils in the first and second grades persist in turning the hand on the side, and thus encourage finger movement writing.

To help pupils overcome this error in position and to aid them in keeping the wrist more nearly flat, rather than on the edge, is something that has perplexed and tried the patience of many earnest teachers. Many devices have been gotten out to help correct this wrong position of the hand and arm, but Lowe's Writing Frame has met with the greatest approval and is most widely used. It is simple in construction, easily used, and effective. It positively prevents turning the hand to the right.

A large number of testimonials from users of this frame could be given if space permitted.
